PROJECTS

Projects	<p>Smart irrigation system</p> <p>This project is selected in Smart India Hackathon 2019 for final round, organized by AICTE, MHRD at national level. Farmers irrigate their farms using water pumps during day as well as night time. We have provided a system by which farmer can control the irrigation system from mobile phone without using internet. This system should also help the farmer to judge the requirement of amount of water for a particular crop depending upon the localized environment conditions. This project also encouraging the farmers to increase the consumption of Green water and Grey water.</p> <p>ONLINE KIRANA STORE SALES MODULES</p> <p>This is a web based project that shows the sales work of the online Kirana Store that will show the available and the selling of products selected by user.</p> <p>PRAYU : AN E-PHARMACY & CONSULTING SERVICE</p> <p>This web application brings to you an online platform, which can be accessed for all your health needs. We are trying to make a healthcare a hassle-free experience for you. Get your all types of medicines at your door steps.</p>
